

Acknowledgement: When doing this work, I am helped very much by discussions with Dr. Y. André. Prof. N. Skoruppa kindly offers us his beautiful calculation stated above, which corrects my first rather formal calculation for it. Prof. F. Hirzebruch offers me a creative atmosphere, in which I can stay for almost 2 years. Prof. S. Lang's constant encouragement makes me to do some works about AG possible. Surely, this work depends deeply on the works of Prof. ~~A. Borel~~ A. Borel, Gillet, C. Soulé, G. Faltings, P. Vojta. I thank them warmly.
